BIG SCIENCE HUB

BIG SCIENCE HUB is a venue where business meets science. It is a platform enabling the flow of knowledge on how, where and with whom to establish relationships that drive measurable revenues.

We bring together companies and institutions involved in innovations and new technologies. They can find new cooperation partners and demonstrate their activities and gain insight into the potential of other businesses, universities and business environment institutions.

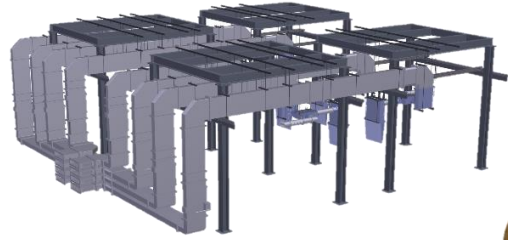

The Polish In-Kind Contribution

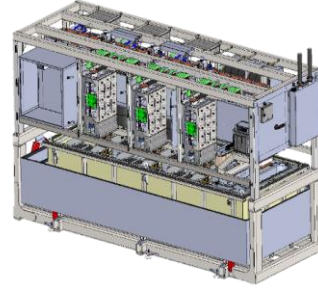

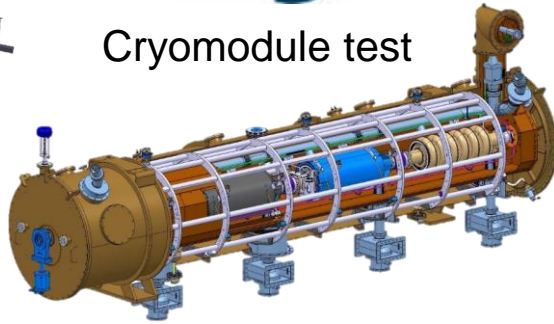

RF Distribution System Installation

Power Converters Installation

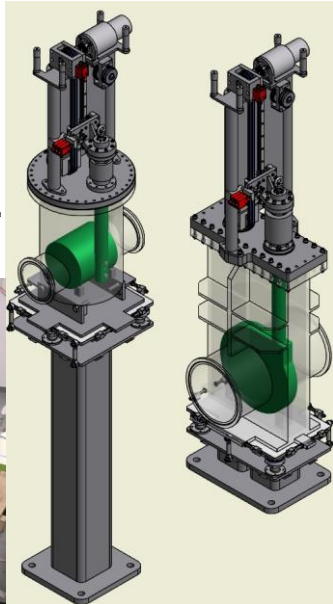

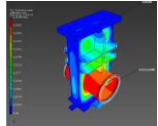

Cryomodule test

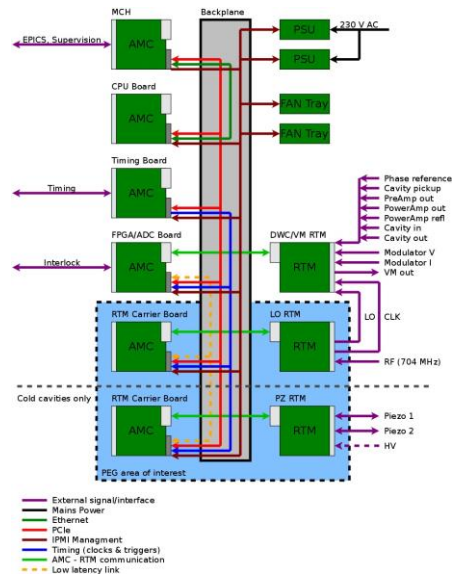

Gamma Blocker system

stop the radiation from activated target

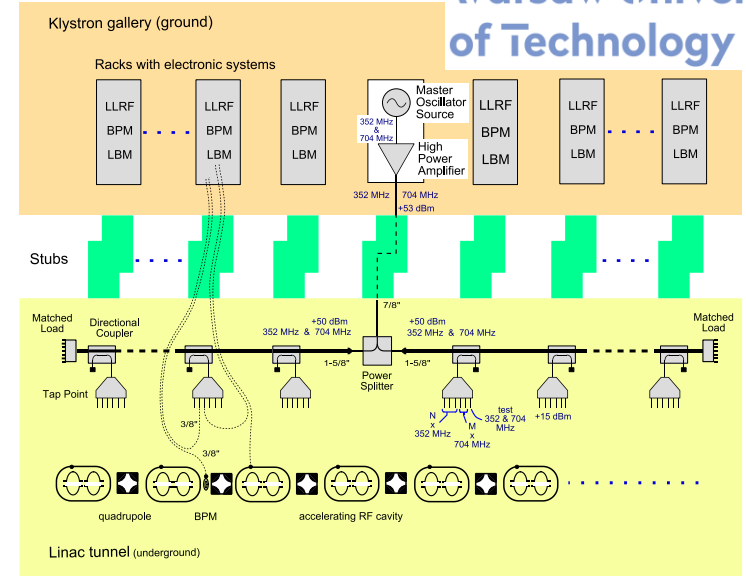

ESS LLRF System

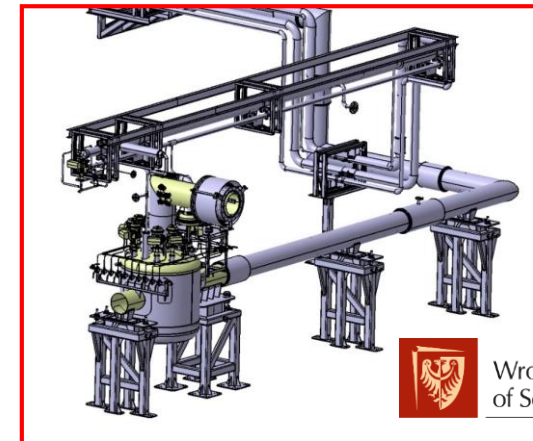

Phase Reference Line

Warsaw University of Technology

Cryogenic Distribution System

Wrocław University of Science and Technology

IKC challenges

How we are working

Two-way flow of information:

- Presenting tenders to Polish companies
- Presenting the capabilities of Polish companies to the Big Science community

Financial support:

- Funding of selected activities provided by government
- Funding from private enterprise
- Occasional funding from projects for dedicated events

Is it a good way to attract industry to Big Science?

BIG SCIENCE HUB
it's not just a portal.
It's a community
