# MAGiC update

X. Fabrèges, S. Klimko, T. Robillard, T. Dupont, W. Schweika, P. Harbott, C. Klauser, U. Filges

# Project management

- Main point:
  - French tendering process is started
  - It is a looooong process

- Guide system first: signature 09/20
- Experimental cave to follow

Sourcing next Tuesday with suppliers

# Project management

PSI VAT exemption signed

• Work starts on the analyzer next week

- 1 year effort
  - PDR
  - Prototype
  - CDR

- Most of the meetings
  - September 20
  - December 20

- Analyzer TG3
  - March 21
  - Final TG3

• ESS common chopper project

Integration of magnetic guide field in progress

• Meeting tomorrow

#### Detectors

- Kick-off meeting with CDT on 12th
  February
  - Small adjustments to the geometry
  - Decision taken on power supplies

- List of requirements from detector group needed
  - Power supplies, monitoring, ...
  - Very useful for a successful TG3

### Monitors

• CTV in April (needs confirmation with Inga)

• Jülich WP => Use DREAM experience

# HS: mechanical progress point

### HS: mechanical progress point

## HS: mechanical TODO

- Hard limit and switches
- Motor and rod gamma protection

• Welded ? Bolted ?

### HS: attenuating block

### HS: attenuating block

# HS: attenuating block

### HS: neutronics

- PHITS calculation of flux in HS
- Needs conversion to dose-rate (in progress)

• 3500 mm collimation after the HS

# Beamline shielding

- First blocks installed !
- Excellent progress and project management

- Visit right after the session.
- Photos next time !

# Experimental cave

# Experimental cave

### Experimental cave

- Neutronics calculations done
- Report in progress

• Expected results next week

- Contract signed in September
- Installation in Q1 21 !

### Polarization

- Guide field design: done
- Rotator design: done
- Saturation field: done
- BBG to chopper design: done

- Spin flipper: TODO
- Guide field at sample: in progress

# Polarization

- Guide field design: done
- Rotator design: done

Meeting with Hal on the 30th of January Polarization workshop at ESS end of March

- Spin flipper: TODO
- Guide field at sample: in progress

# Analyzer

• Work starts next week

- PDR in June
- Prototype tested at PSI in July

• Expected TG3/CDR Q4-20 -> Q1-21
