EPICS Overview

Tuesday, 6 May 2014

Second session: HW and other devices: On the second day we will take a look at how hardware devices like motors, serial, PLC are integrated into the control system using EPICS. We will cover the concept of Device Support and how EPICS can be extended to integrate different types of hardware devices. I will also present the extension modules Asyn Port Driver, Stream Device, Motor Record and others which allow us to simplify device integration into EPICS. - Tänkartanken (09:00 - 12:00)
